

## Calcium - Marble Deposit For Sale in Queensland Australia

We hold a mining lease granted by the Department of Natural Resources and Mines on 16/9/2011 for a term of 20 years. The project is at its early stage of exploration status. Assay results of this 13.59 hectares show quality limestone and high grade calcium marble. The resources estimate is 2.02Mt.

The mining lease is located 11.5km west of Almaden, which is approximately 173km by road, west of Cairns and 112km south-west of Mareeba. The nearest town is Chillagoe. Its location provides excellent access to a skilled workforce and infrastructure. Highlights of the mining lease includes:

- The resources is a very high-grade calcium marble with chemistry purity of approximately 56% CaO
- High abundance of calcium oxide and high weight loss on ignition due to dominant presence of calcite
- High grade limestone or pure marble
- Suitable for use in industrial fillers and stone dusting as well as agricultural lime productions, manufacturers of Portland cement and as metallurgical limestone
