Highly Prospective Exploration Project

Battery Minerals and Conglomeratic Gold Pilbara Region, Western Australia

Pilbara Tenement Package prospective for Lithium, Cobalt, Precious and Base Metals

Summary:

This exciting 836km² (206,000 acres) tenement package (8 tenements) is being offered on very realistic terms and will not last long. Expressions of Interest sought: Cash, Stock, NSR for whole package.

Pinga Creek: (Lithium) Ground has common border with Pilbara Resources & Australian Lithium's tenements.

Mundine Well: (Lithium) Located within pegmatitic intrusions from the young and fertile Tambourah Monzogranite into greenstone, a common geological setting to the Pilgangoora and Wodgina Lithium deposits. Prospectivity enhanced by the peraluminous character of the Monzogranite.

Nullagine: (Conglomeratic Gold) Located with common border to Novo's Beaton's Creek conglomeratic gold discovery Exploration Licence area. This discovery helped to propel Novo to an 800% gain over the last 6 months and has formed the single most compelling narrative behind the Pilbara gold rush; mapped evidence of highly prospective Lower Hardy Fm lithologies inclusive of the Mt Roe Basalt. Highly prospective for both Lower Hardy and Mt Roe Basalt conglomeratic gold.

Braeside West: (Base Metals) Continuation of same Lower Hardy Fm lithologies in Rumble Resources ground where recent drilling/sampling has turned in grades of up to Lead 42.8%, Zinc 17.3%, Copper 15.1%. Tenement has common border with Rumble's tenement.

Nugget Well: (Gold) Famous Pilbara gold discoverer, Dennis O'Meara, reported 12 magnetic anomalies, most showing anomalous gold mineralisation.

McKay Range: (Copper, Cobalt, Gold, Silver, Base Metals) Located in the Nifty, Yeleena, Maroochydore Gold/Copper/Cobalt/Silver, Lead & Zinc Belt.

Double Dragon: (Copper, Cobalt, Gold, Silver, Base Metals) Situated on a major O'Driscoll lineament, common to the Telfer gold deposit, on strike in Broadhurst Fm, host to the Nifty Copper, Maroochydore Copper/Cobalt & Yeleena Copper/Cobalt deposits.
